## 1. Getting Started

This plugin allows you to build a classifieds listings or dealership listing website. Easily import your listings, set taxonomies, manage subscriptions, use our optimized search filter. Feel free to provide your feedback. If you need a ready theme for your business, you can purchase it here:

<http://stylemixthemes.com/demo/motorswp>.

### 1.1. Install Motors

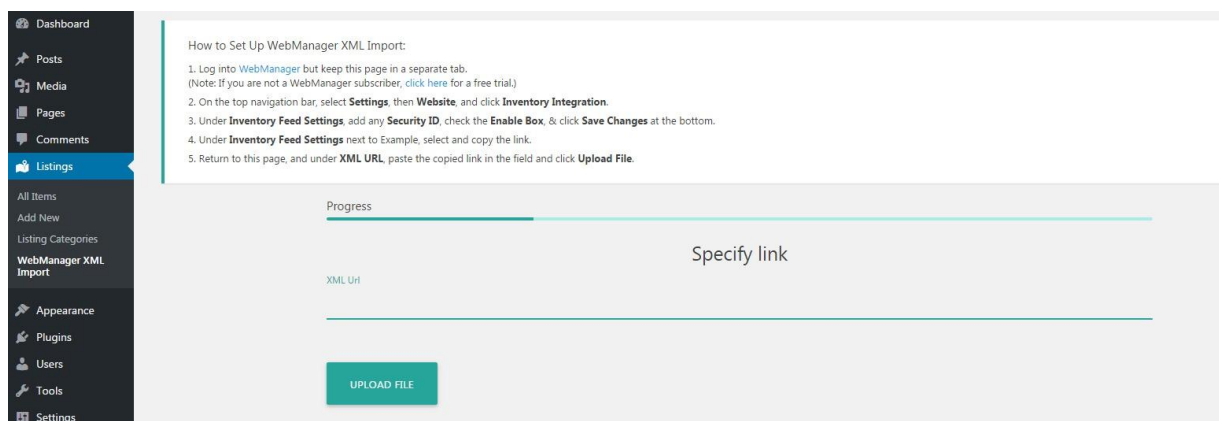

If you have web hosting and would like to install Motors, using the WordPress Admin is the most straightforward option, as it handles the file transfer without you needing to leave the Web browser. To install Motors:

1. **Log into** your WordPress Admin panel.
2. Go to: **Plugins > Add New**.
3. **Type** 'Motors' into the Search Plugins field and hit Enter. Once found, you can view details on the point release, rating and description.
4. **Click** Install Now. After clicking the link, you'll be asked to confirm this action.
5. **Click** Yes, and WordPress completes the installation.

### 1.2. Import the demo

If you want to import demo content, in plugin files you will find **dummy\_content** directory. There are two files: **listing\_categories.json** and **dummy-content.xml**. Firstly, go to **Listings -> Listing Categories** and on your top right side will be settings import, where you need to upload **listing\_categories.json**. After that, go to **Tools -> Import**, and via [Wordpress Importer](#) tool install **dummy-content.xml**.

Plugin includes 4 pages: Listing Inventory, Add a car Page, Compare Page, Single Listing page and author profile (private and public).

## 1.3. Shortcodes

There are some shortcodes in order to create related pages for the plugin:

**Add a car page:**

```
[stm_add_a_car_page]
```

**Compare page:**

```
[stm_add_compare_page]
```

**Login page:**

```
[stm_add_login_page]
```

## 1.4. Automanager XML Import

How to Set Up [WebManager](#) XML Import:

1. Log into WebManager but keep this page in a separate tab. (Note: If you are not a WebManager subscriber, [click here](#) for a free trial.)
2. On the top navigation bar, select **Settings**, then **Website**, and click **Inventory Integration**.
3. Under **Inventory Feed Settings**, add any **Security ID**, check the **Enable Box**, & click **Save Changes** at the bottom.
4. Under **Inventory Feed Settings** next to Example, select and copy the link.
5. Return to this page, and under **XML URL**, paste the copied link in the field and click **Upload File**.

The screenshot shows the WordPress dashboard with the 'WebManager XML Import' page selected in the sidebar. The main content area displays the following instructions:

How to Set Up WebManager XML Import:

1. Log into WebManager but keep this page in a separate tab. (Note: If you are not a WebManager subscriber, [click here](#) for a free trial.)
2. On the top navigation bar, select **Settings**, then **Website**, and click **Inventory Integration**.
3. Under **Inventory Feed Settings**, add any **Security ID**, check the **Enable Box**, & click **Save Changes** at the bottom.
4. Under **Inventory Feed Settings** next to Example, select and copy the link.
5. Return to this page, and under **XML URL**, paste the copied link in the field and click **Upload File**.

The form below the instructions has a 'Progress' bar and a 'Specify link' label. The 'XML URL' field is empty, and there is an 'UPLOAD FILE' button at the bottom.

## 2. Plugin Features

### 2.1. Settings and Options

**WordPress Customize** allows you to setup the general settings of the plugin. In WordPress menu go to **Appearance > Customize -> Listing**. Here you can setup most important options of your plugin.

**Inventory settings:**

- **Listing archive:** Here you need to select main Inventory page.
- **Price currency & position:** You can price currency and position here.
- **Price delimiter:** Price delimiter will be used for thousands.

The screenshot shows the 'Inventory settings' panel in the WordPress Customizer. The breadcrumb trail at the top indicates 'Customizing > Listing'. The panel contains the following settings:

- Listing archive:** A dropdown menu with a downward arrow. Below it is the text 'Choose listing archive page'.
- Price currency:** A text input field containing the dollar sign '\$'.
- Price currency position:** A dropdown menu with 'Left' selected and a downward arrow.
- Price delimiter:** An empty text input field.
- Show stock:** A checkbox that is checked.
- Show compare:** A checkbox that is checked.

**Single Listing Settings:** Here you can select options in order to show/hide on Single Listing page.

## User/Dealer options:

- **Add a Listing page:** Choose page for Add to car Page (Also, this page will be used for editing items).
- **User post and Upload image Limits:** You can set your own amount for limiting User posts and uploading images count.
- **Enable User ads moderation:** This option allows to Admin moderating added Listings before publishing.

The screenshot shows the 'User/Dealer options' settings page. At the top, there is a breadcrumb trail: 'Customizing > Listing' followed by 'User/Dealer options'. Below this, the first section is 'Add a car page', which contains a dropdown menu. A note below the dropdown reads: 'Choose page for Add to car Page (Also, this page will be used for editing items)'. The next section is 'User Posts Limit:', with a text input field containing the number '3'. Below that is 'User Post Images Upload Limit:', with a text input field containing the number '5'. At the bottom, there are two checkboxes: 'Enable User ads moderation' (which is checked) and 'Site demo mode' (which is unchecked).

## 3.2. Listing Category settings

You can modify or add your own filter options via **Listings -> Listing Categories**. Via editing a Listing Category you can set up filter option, visualization and other settings. In order to modify Listing taxonomies you need to go via **manage** icon.
